

### REMARKS

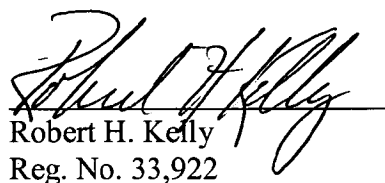

The above-proposed amendments to the claims include new claims, claim 23-46.

Support for the recitations of the claims is found, e.g., with respect to Figure 1 and its corresponding description on page 8, line 10 – page 10, line 17 and with respect to Figure 2, lines 18-20. Support for the recitation of hyperfocal is believed to be inherent in Figure 1.

As now-amended, the application is believed to be in condition for the Examiner's early examination and consideration for allowance. Such early action is earnestly solicited.

Respectfully submitted,

Dated: 18 Feb 05
